PROFESSIONAL SUMMARY

Frontend Developer with 1.4+ years of experience building scalable, high-performance web applications using React.js, Next.js, TypeScript, and JavaScript. Skilled in translating Figma wireframes into pixel-perfect, responsive UIs and integrating RESTful APIs with efficient state management. Delivered real-world SaaS products across EHS, AI chatbot, fintech, franchise management, and stock trading domains. Strong focus on clean code, reusable component architecture, and collaborative agile delivery.

SKILLS

React & Core: React.js (Hooks, Context, Memo, Lazy), JSX, Component-Driven Architecture
Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
State Management: Zustand, TanStack Query (React Query)
Styling & UI: Tailwind CSS, Shadcn UI, Radix UI, Framer Motion, Responsive & Pixel-Perfect UI
APIs & Integration: RESTful APIs, Axios, Yup Form Validation, Claude API (AI Integration), JSON
Next.js: SSR, SSG, App Router, Pages Router
Tools & DevOps: Git, GitHub Actions (CI/CD), Vite, Figma
Soft Skills: Agile / Scrum, Team Collaboration, Problem-Solving, Clean Code Practices

WORK EXPERIENCE

Vivansh InfoTech | Web Developer

Apr 2025 – Present

- Design and develop scalable frontend applications using React.js, Next.js, TypeScript, and JavaScript, following modern UI/UX and clean code standards.
- Build pixel-perfect, fully responsive UIs with Tailwind CSS and implement reusable, modular components to improve team development efficiency.
- Integrate RESTful APIs using Axios and TanStack Query, ensuring efficient data fetching, caching, and robust error handling.
- Ensure cross-browser compatibility and accessibility compliance, collaborate closely with backend developers and designers across agile sprint cycles.

Vivansh InfoTech | Web Developer Intern

Jan 2025 – Mar 2025

- Translated Figma designs into responsive, production-ready interfaces using React.js and Tailwind CSS.
- Built and maintained reusable UI components following component-driven development practices.
- Handled REST API integration, form validation using Yup, and client-side data management.
- Worked with Git-based workflows and actively participated in agile development ceremonies.

AI-POWERED PROJECTS (FRONTEND / API INTEGRATION)

AI Chatbot & Report Intelligence — Capability.work

React.js · Next.js · TypeScript · Tailwind CSS · Claude API · RAG · Vector DB · Zustand

- Integrated an AI chatbot connected to the Claude API with RAG (Retrieval-Augmented Generation) and a vector database, delivering contextually accurate, domain-specific answers within the EHS platform.
- Built an AI Report Summary feature where users upload EHS reports or documents and the Claude API analyses the content, generates a structured summary, and provides actionable suggestions and safety recommendations.
- Developed dynamic AI-driven form flows where the Claude API generates intelligent follow-up questions based on user context and prior answers, with an answer quality rating system (thumbs up/down, star ratings) for structured feedback collection.
- Built a human support handoff interface with a waiting room UI and live agent join room, enabling seamless escalation from AI to human support mid-conversation, with real-time push notifications for agent availability.

KEY PROJECTS

Capability.work — EHS Training & Work Management Platform

React.js · Next.js · TypeScript · Tailwind CSS · TanStack Query · Zustand · Shadcn UI

- Developed a responsive web application for an Environmental, Health & Safety (EHS) platform supporting training management, incident reporting, and compliance tracking.
- Built dynamic dashboards, a course builder UI, team management modules, and real-time reporting features with a strong focus on usability and performance.
- Designed modular, reusable component libraries and optimised rendering for scalability across future feature expansions.

CHRGD Technologies — Franchise Management SaaS Platform

React.js · TypeScript · Tailwind CSS · Zustand · Stripe · Toast POS · REST APIs

- Contributed to a SaaS platform streamlining franchise operations and financial workflows for admins, franchisors, and franchisees.
- Implemented automated royalty payment handling via Stripe integration and real-time order tracking through Toast POS.
- Built role-based access control with data visualisation dashboards providing clear operational insights across all franchise levels.

Rembrandt Advantage — Psychological Assessment Platform

React.js · TypeScript · Tailwind CSS · REST APIs

- Built a dynamic report template builder for generating fully customised behavioural and psychological assessment reports.
- Implemented complex conditional form logic and dynamic rendering to support variable assessment structures and personalised output formats.

Kuber Grow — Stock Order & Pricing Management Platform

React.js · TypeScript · Tailwind CSS · TanStack Query · Axios

- Developed frontend modules for bulk stock purchasing, order processing, and real-time stock pricing workflows.
- Implemented complex UI logic to handle large-volume transactions with accurate pricing calculations and strong data consistency.
- Optimised rendering performance to ensure reliable, real-time financial data presentation across high-volume operations.

EDUCATION

B.E. Computer Engineering — Government Engineering College, Rajkot

Jun 2021 – May 2025

Gujarat Technological University | CPI: 7.91 / 10.0

Class XII (HSC) — Alpha Vidhya Sankul, Junagadh

Jun 2020 – May 2021

Gujarat Secondary & Higher Secondary Education Board | 88.30%
